Words Across the Globe using Google Earth

Place Marker Icons
Before placing a place marker icon, navigate to the desired location using the navigation tools or typing the location in the Search window.

Click on the New Placemark icon and move the icon to the desired placement.

In the Google Earth – New Placemark pop-up window, replace “Untitled Placemark” with the desired vocabulary word.

If you would like to change the appearance of the icon, click the icon button in the Google Earth – New Placemark pop-up window. Suggestion: use a push pin that has the first letter of the vocabulary word.

The Style,Color tab allows you to change the size of the title (vocabulary word) that will appear on Google Earth. Suggestion: Scale – 2.0.

The View tab allows you to lock in the current view of Google Earth (click the “Snapshot current view” button).

Formatting Place Marker Pop-Up Descriptions
You can include information that pops up when a place marker is clicked.

To get to the Edit Placemark window, right-click on the placemark and choose “Properties.” HTML code isn't necessary, but with just a few basic html codes, you can "dress up" your pop-up descriptions significantly. For example, you can pull in graphics from online locations and/or hyperlink to other Web sites. Also, by including some simple html code, you can change the appearance of the text that appears in the pop up description.

HTML Code
To increase the font size use <font size="#"> (replace the # with an actual value)
Ex: Place <font size="5"> as the first line and </font> as the last line to increase all the text that appears; can also be used around specific words, sentences, or paragraphs

To bold a word or phrase use <b> before the word/phrase and </b> immediately after
Ex: <b>This would give this</b> ➔ This would give this

To italicize a word or phrase use <i> before the word/phrase and </i> immediately after
Ex: <i>This would give this</i> ➔ This would give this

Can be used together:
Ex: <b><i>This would give this</i></b> ➔ This would give this

Also:
<p> inserts a blank line between sentences
<br> inserts a line break, but no blank line between sentences.
1. Whatever is typed in Name box appears as top line of popup in Bold.

2. To insert an image.
   Code used: `<img src="url of image">`

3. To hyperlink to other online sources.
   Code used: `<a href="url">linked text</a>`

4. Can simply type text

5. Can use html code
   To increase the font size use `<font size="#">` (replace the # with an actual value)
   To bold a word or phrase use `<b>` before the word/phrase and `</b>` immediately after
   Ex: `<b>This would give this</b> → This would give this
   To italicize a word or phrase use `<i>` before the word/phrase and `</i>` immediately after
   Ex: `<i>This would give this</i> → This would give this
   Can be used together:
   Ex: `<b><i>This would give this</i></b> → This would give this
   Also:
   `<p>` inserts a blank line between sentences
   `<br>` inserts a line break, but no blank line between sentences.
